**Course Title:** ACT (ATTACK COUNTERMEASURES TRAINING) 
**Violence Prevention & Active Shooter Survival**

**Category:** Homeland Security, Emergency Management and Critical Incident Management

**Overview:**
The ACT Cert Violence Prevention & Active Shooter Survival course teaches effective prevention and response, addressing recognition of risks, pre-attack indicators and reporting early warning signs of violence. Also taught, are best practices on how to effectively implement security measures to deter potential attackers and improve preparedness.

Training also addresses the critical role of “On-Location Responders”, during the initial moments of an active-shooter incident, prior to law enforcement intervention (when most casualties occur).

Participants learn how to rapidly assess the threat, use cover, evacuate safely when possible, and how to barricade and hide from a shooter. Topics will also cover safe interaction / communication with responding officers. Last resort survival measures for fighting the shooter and taking control of a weapon are addressed.

Skills learned can be adapted by participants with varying levels of experience, and are designed to enhance, complete and compliment any previous training experience.

No one knows where or when an active-shooter incident will occur. Counting on others to save us will not always work. However, pre-incident training may reduce our vulnerability and increase our chances for survival.
